TERRA

fabrics collection 2024

Imperfect, permanent, alive.

A textile anthology that evokes memories of quiet times, gestures and old rituals. Earthly tones, natural materials, and a sense of calm elegance. Browns and chocolates, beige, cafe latte and warm whites layer to create atmospheres suspended in time in deep connection with nature. Opaque surfaces, strong textures and an unmistakable sense of colour define a return to the innate power of simple and harmonious design. The need for re-setting our values with something simple and familiar; the pleasure of disconnecting from a hectic modern life: these ideas inspire the whole series of fabrics. A return to ancient and forgotten fibres like hemp and jute enables C&C Milano to develop products that are naturally great insulators with the benefit of breathability. *Crispiano*, *Maruggio* e *Taranto*, three different weights in wide width, perfect for creating layered bed linens and draperies. Pure linen is declined in sartorial fabrics in which texture and colour bring the beauty of the fibre to the foreground: *Salina*, *Lipari* and *Ranieri Barrè* wide width in different gradients of transparency, evoke the softest colours of natural landscapes; *Panama*, *Rio*, *Gea*, a sturdy corduroy, and *Ernestino* are sophisticated products for decoration and upholstery that make high resistance their strong point. Wool yarns meet with flax fibres to shape two hardy upholstery fabrics, *Garcia* and *Diego*, in which irregularities on the surface make these artifacts authentic and unique. Our bestselling linen and cotton blend *Palea Rigato* wears a new tone of white for unexpected tone on tone effects. C&C Milano series of handwoven throws welcome a new style, *Charlotte*, in dense and soft camelhair and silk bouclé: every piece is handmade, slowly with care by San Patrignano Design Lab. The performance collection is expanded with two new indoor/outdoor qualities. 100% solution dyed acrylic, *Baia* and *Ruga*, are resistant to abrasion, colour fast and easy care. *Rua Prince of Wales*, C&C Milano's signature performance jacquard brings a timeless pattern into the performance market, 100% fireproof and outdoor polypropylene.

“Simple in aesthetic, but rich in tactility and made with a sophisticated method of manufacture the new fabrics by C&C Milano for upholstery, decoration and bed linens remind us to get in touch again with matter and craft.”
