the Poetry collection

Hello, my name is Charlotta Sandberg and I am Majvillan's founder and creator. I have the privilege to be able to draw and design our wallpapers completely from my heart and would like to introduce my fifth collection - Poetry. Each collection starts with an emotion and Poetry is no different, I would describe it as romantic, the colors are warm and soft and the patterns radiate a gracious homely feeling. From the very start I envisage houses and rooms and I imagine wandering into them to explore. What are they doing there? What music do they listen to? What's the aroma coming from the kitchen. What flowers do they have in their vases? Are the textiles heavy or light? When I have captured the feeling, I go on to express it in sketches and colors which then develop into wallpaper and new rooms. Rooms for both young and old and everything that is part of life's poetry.

We are proud that our wallpapers are printed by Sweden's oldest wallpaper manufacturer, where traditional craftsmanship is combined with modern technology to make the process as environmentally friendly as possible. The colors are water based and completely free of solvents and PVC.
