Woven Earth

A BOLD, SENSORIAL JOURNEY

Woven Earth is inspired by the marriage of nature and human craft across our planet. It explores landscapes touched by human hand, traditional crafts honed over time, and the artistry of nature, the flora and the fauna.

Created for those who find beauty in fabrics woven with meaning – the collection translates the slow processes of nature and human craft into woven form, where layers, scars, trails and tracks become slubs, stripes and structure. From fine etchings to bold stripes, *Woven Earth* is both grounded and elevated, designed for modern and classic interiors that celebrate tactility, authenticity, and the quiet luxury of artisanship.

TRUE LUXURY TAKES TIME

Each fabric in Woven Earth is an exemplar of modern craftsmanship. True artistry and passion have been applied to every step in their design and production – from the farmers who grow the flax, hemp, wool, and silk to the mills weaving each cloth. The collection showcases the versatility of these natural yarns. BERNIE DE LE CUONA

A WORLD OF INSPIRATION

BEETLE – *SIBERIA*

Beetle is a double-sided pocket cloth, its design inspired by the intricate trails carved into tree bark by the Siberian Bark Beetle.
